Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between December 16, 2021 and February 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County | Type of Concern | Inspector Initials | NOV | RNOV |
|-------------|---|---------------|---|-----------------|-----------------|--------------------|-----|------|
| Concern No. | 48011 | Concern Info | A company purchased former Seba property near 247th (State Route Y) and Prospect (between Cleveland and Beyer Crushed Rock quarry-west and south of peculiar) and they have been spraying or land applying something that leaves a di on everything outside and the concerned party gets a headache. There is also a strong musty, yucky odor. The CP believe Suburban Lawn purchased the property (there are a lot of properties previously owned by Seba Bros Farm in the area) . TI CP said their neighbor know more about the location where the spraying is occurring. I gave them the field activity number they or their neighbor can call and provide or obtain more info about the investigation. I did explain that sometimes there's limited things the Department can do when it comes to agricultural activities. If we cannot do anything, they would like to know where they can go for help. Mostly they want to know if whatever is being sprayed, is safe | | | | | |
| Comments | No violations were observed. Appears to be an agriculture activity related to the growing of crops. | | | | | | | |

Concerns Investigated Between
December 16, 2021 and February 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County | Type of Concern | Inspector Initials | NOV | RNOV |
|-------------|---|---------------|---|--------------------|-----------------------------|--------------------|-----|------|
| Concern No. | 48076 | Concern Info | Received a joint call from the Fire Chief of Savannah Rural Fire Protection District and Emergency Management Director of Andrew County. They reported they had a property owner (Gary Griffin) located at 18102 County Road 393 in Amazonia where the fire department had responded approximately 6 times in 2021 having to put out very large fires. Fire Chief stated that reports a photos of past incidents can be provided to the department. Explained that they needed help with this issue and were reaching out to DNR to see what regulations for these type of issues would apply. Stated that property owner had a business where he picks up other people's waste. States the truck says something like "Same day Hauling" and brings it back to his property and is burning it. Stated that just yesterday the fire department responded and had to put out a trailer house fire but that appeared to be related to alcohol and domestic issues with his female companion/wife?. Stated that if DNR does go out to the property, we should ask for one of the local agency representatives to accompany us Note: Open burning regulations were provided to the concerned parties per email. (Fire chief for Savannah Rural Fire District and EMD of Andrew County) | | | | | |
| Comments | Gary Griffin was found to be out of compliance with the Missouri Air Conservation Law and its implementing regulations based upon observations made during the inspection. A Letter of Warning has been issued for the following violations: open burning and dumping | | | | | | | |
| KCRO | 12/29/2021 | 12/21/2021 | AA Quarry, LLC | Kingsville Johnson | Fugitive Particulate Matter | DS | | |
| Concern No. | 48154 | Concern Info | Radmacher Quarry on AA Road has bad dust off the property and tracking rock and dust onto AA Road. | | | | | |
| Comments | No violations were observed at the time of investigation. We will conduct periodic surveillance when in the area to observe for violations. | | | | | | | |

Concerns Investigated Between December 16, 2021 and February 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County | Type of Concern | Inspector Initials | NOV | RNOV |
|--------|--------------------|---------------|---------------------------------|------------------------|-----------------|--------------------|-----|------|
| KCRO | 12/22/2021 | 12/22/2021 | SealMaster | Kansas City Jackson | Odor | MC | | |

Concern No. 48187 **Concern Info** Facility is making asphalt products near residential area. Caller indicated that the smell is so bad that his brother who lives one block to the west has had to leave his home with his kids due to odor.

SDS sheets online indicate products contain heavy paraffinic solvent CAS #6742-04-7 and carbon black. There are a large number of totes on the property and what looks to be heated tanks on the west side of the building.

Comments This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program (KCAQ).

KCAQ is intimately familiar with this facility. They are a seasonal business that only operates until October. Once the temperature dips below 50 degrees, they shut down for the year, so KCAQ would be surprised to learn that they're still emitting anything. KCAQ will check out the neighborhood odor still.

| | | | | | | | | |

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County | Type of Concern | Inspector Initials | NOV | RNOV |
|---|--------------------|---------------|---------------------------------|---------------------------|---|--------------------|-----|------|
| <p>Concern No. 48321 Concern Info ?The Cameron Co-operative has four (4) grain bins. They are looking to add on two (2) more. The CP stated that there is corn all over the ground, and blowing on to the road and into his yard. There is a zoning meeting on 12/30/2021 that the CP is attending to attempt to prevent the extra grain bins. The CP stated that the corn should stay on the property of the co-op.</p> <p>Comments Republic services acquired heartland waste and October 2021. Since then they have sporadically picked up trash and left others. There is hazardous waste in biohazard material and rotting food waste setting out in multiple areas of the town. Trash is overflowing dumpsters and trash bins all over town including businesses. There is an apartment complex that has heaping loads of trash that may be gets picked up every few weeks. Animals are scattering it all about town.</p> | | | | | | | | |
| KCRO | 1/6/2022 | 1/3/2022 | Jim/Tim Thorpe | Rich Hill Bates | General Water Quality Open Burning Open Dumps | AW | | |
| <p>Concern No. 48226 Concern Info The area of concern is the third house along the east side of SW County Road 27. The CP explained that the land owner is burning items such as couches and trash that are pulled from storage units. They dump the items in the floodplain of Mudd Creek, then burn the items by the culvert along SW County Road 27. The burned items are then pushed into the creek.</p> <p>Comments Referred to city of Rich Hill for possible City Ordinance Violation</p> | | | | | | | | |
| KCRO | 1/11/2022 | 1/10/2022 | Brian W and Karla A Morris | Higginsville Lafayette | Open Burning | JS | | |
| <p>Concern No. 48300 Concern Info Neighbor started burying materials but then collected material from local houses, including roofing shingles, to burn along with wood and other residential (house) debris.</p> <p>Comments Responsible party appeared to be primarily burning vegetation from the property. No violations were observed during the investigation. Guidance was provided to assist the responsible party in complying with burning and asbestos requirements.</p> | | | | | | | | |

| KCRO | 1/10/2022 | 1/10/2022 | Claycomo Shooters Indoor Range & Gun Store | Claycomo Clay | Hazardous Air Pollutant Release | MC | | |
| Concern No. 48311 Concern Info This shooting range has no filtering system. All lead for the shooting range is pushed outside with no filtering system. The system they had broke down, and the owner has refused to repair it due to the cost. All lead and powder is pushed by a fan straight out on a parking lot. | | | | | | | | |
| Comments The concern does not appear to be regulated by the Department. | | | | | | | | |
| KCRO | 1/24/2022 | 1/11/2022 | William and Waneta Peek | Calhoun Henry | Open Burning | DS | | |
| Concern No. 48312 Concern Info It has come to my attention that a pond on 859 ne 955 private rd, calhoun MO has had lots of trash including propane tank vehicles, automotive waste dumped into it as well as a vehicle that was pushed into a creek on the property. There are also reports of mass burn piles of insulated copper wire to easily remove the plastic to sell the copper for scrap. | | | | | | | | |
| Comments No violations were observed in regards to the burning. Refer to Solid Waste investigation for compliance issues and requirements. | | | | | | | | |
| KCRO | 1/18/2022 | 1/14/2022 | Remco Demolition, LLC | Grandview Jackson | Asbestos | JS | | |
| Concern No. 48370 Concern Info The old Popeye's Chicken restaurant in Grandview was tore down. I look for an asbestos demo notice on DNR's website, I didn't see one. | | | | | | | | |
| Comments The project was properly notified; however, a clerical error by the Department caused the project to not show up properly on the website. Issue was corrected; project appears in compliance. | | | | | | | | |

| KCRO | 1/21/2022 | 1/21/2022 | | Odessa Lafayette | Particulates | MC | | |
| Concern No. 48385 Concern Info Smoke billowing from outdoor furnace and lingering all over block for several hours now | | | | | | | | |
| Comments The source of the concern is a wood-burning furnace used for heat and hot water. Only wood is burned. This activity is allowed under Missouri's air pollution regulations. | | | | | | | | |
| KCRO | 1/25/2022 | 1/25/2022 | William Mann | Kansas City Platte | Odor | MC | | |
| Concern No. 48397 Concern Info The farm located at 9601 N. Platte Purchase Road, Kansas City, MO, had been dumping a large quantity of fertilizer/manure on their property over the past few weeks. A residential subdivision is directly across the street from this farmland. The odor that has been emanating from this property is absolutely the worst thing I've ever smelled in my life. It is unbearable to be outside, especially when the temperature gets above freezing. Even as of today, more of this product was delivered. The truck delivering it was marked "Synagro". This is causing members of my family to have headaches, burning eyes, and to physically gag when going outside. We are even beginning to smell it inside the house. | | | | | | | | |

Concerns Investigated Between December 16, 2021 and February 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

| Region | Investigation Date | Date Received | Suspected Source Owner/Operator | City/County | Type of Concern | Inspector Initials | NOV | RNOV |
|---|-----------------------|------------------|------------------------------------|----------------------|--------------------------------------|-----------------------|-----|------|
| Concern No. 48403 Concern Info A high school required high school students to complete asbestos abatement (floor tile) without proper training over the 20: summer. The students were also not given any respiratory protection, were told to purchase masks if they wanted them. It also appears that the tile was not properly bagged for disposal (wet double bagged). | | | | | | | | |
| Comments Information was provided to the school district regarding how to comply with the Department's asbestos regulations. The school indicated that the asbestos was handled by certified professionals, and the project is now complete. There is no current activity to investigate. No further actions are warranted at this time. | | | | | | | | |
| KCRO | 2/10/2022 | 2/8/2022 | Jeff Haven | Platte | Open Burning | DS | | |
| Concern No. 48525 Concern Info Burning from an excavation site. Concerned party said that over 100 homes in the surrounding area have been damaged f smoke. He stated that the excavation company has an air curtain destroyer but that they are not using it properly. He also said that he contacted the South Platte County Fire District's fire marshal, who said there is nothing he could do because o permits. Concerned party requests that he be called if any further questions or info are needed. | | | | | | | | |
| Comments There were no violations found for the open burning concern. It was found that they may be operating without a land disturbance permit, so the water is the process of determining if they are in violation with that. | | | | | | | | |

|--|--------------------|---------------|---------------------------------|-----------------|-----------------|--------------------|-----|------|
| <p>Concern No. 48522 Concern Info This company recycles tires. There is a very bad smell coming from their facility when they are in operation. It smells like burning tires or very hot rubber. I work in a nearby factory and I can smell the tire burning smell inside of our building when the wind is out of the north. I also live near the center of Maryville and can smell the tire burning smell at my house which is over a mile away. I fear that they are releasing carcinogens into the air that will cause an increase in cancer cases in this area one day.</p> <p>Comments I was unable to confirm a current odor issue at the facility while on site for the investigation. The facility confirmed that it had some gas releases correlated to weather issues with the flare and troubleshooting events with the new pyrolysis unit, which may be related to the reported odors.</p> | | | | | | | | |

|------|-----------|----------|-----------------|-----------------------|--|----|--|--|

Concern No. 48337 **Concern Info** Caller reports that two months ago a house was burned and buried in Rothville, and may have had asbestos. Caller state that the new owners who disposed of the house are Jennifer & Tracy Bowen, and the address is 37104 North Avenue. Call stated the house was buried at multiple locations, including a site 10 feet south of foundation, a cistern 10-15 feet east of the foundation, and a ditch southeast of the foundation.

Comments Violations of the Missouri Solid Waste Management Law and Regulations were determined. At the time of the investigation, it was determined that Jer Bowen had dumped, or allowed the dumping of, approximately 55 cubic yards of regulated waste consisting of furniture, carpet, carpet padding, household items, vinyl siding, lumber/scrap wood, shingles, tile, garden tools, scrap metal, cardboard boxes, clothing, bedding, household/residential waste, and other miscellaneous wastes onto the surface of the ground. A Letter of Warning will be issued to Jenny Bowen for the violations determine

| NERO | 1/10/2022 | 1/10/2022 | Robert Eugene Wooden | Eagleville Harrison | Permitting | RD | | |
| Concern No. 48377 Concern Info The caller reports that on Saturday, January 8, at about 2:30 p.m., a neighbor, Robert Wooden, was burning something that created a very dark black smoke. There was a video taken of the smoke that was posted to YouTube. It can be found at https://www.youtube.com/watch?v=Py8AAPKYudA . It created health issues for the concerned party's family. It is believed that have been used oil or other materials generated as a result of Robert Wooden's trucking business. | | | | | | | | |
| Comments Robert wooden had been burning regulated material in his wood stove. | | | | | | | | |

|---|--------------------|---------------|---------------------------------|--------------------------|-----------------------------|--------------------|-----|------|
| Concern No. 48339 Concern Info Perry Machine & Die owns property directly across Highway J from their main business. When driving by on Saturday I observed a large pile of waste burning behind their building, in an area between the back of the building and the timber. There were people bringing stuff out of that building where the fire was & throwing the waste on the fire. The flames were about 1 foot up in the air & the smoke was dark black. I asked people in the area what they were doing & was told Perry Machine & Die is getting that building emptied out so they can move a process in that building. | | | | | | | | |
| Comments In violation of the Missouri Open Burning Rule. A Letter of Warning will be issued with required actions. | | | | | | | | |
| NERO | 1/14/2022 | 1/14/2022 | Shelbina First Christian Church | Shelbina Shelby | Asbestos | SB | | |
| Concern No. 48336 Concern Info The caller reports that two houses are being demolished by a church in Shelbina. There is an inspection on one of them done by the City of Shelbina that found TSI containing 66% asbestos. Caller is concerned that a contractor has been hired that will not remove the asbestos properly. | | | | | | | | |
| Comments No violation found of the asbestos NESHAPs regulations. An asbestos inspector had already been hired and steps were being taken to address asbestos in the buildings. Provided information on the asbestos requirements to the property owner. | | | | | | | | |

| Concern No. 48405 Concern Info The air pollution from Boone Quarries is extremely bad. I have dust in my closet, on and in my car, on my home, on my yard. The engine in my car has white dust on it from the Quarry. You can see the dust coming over Creasy Springs Rd while driving on the Road. Bear Creek Trail is beside the Quarry where citizens work out by running, walking, and etc. The Trail is exposed to the dust. You can see dust on the trees, and etc on the Trail. People walking or running on the Trail are breathing the dust. Creasy Springs Rd has much traffic on it, therefore, are exposed to the dust too. Some people shut their windows on their car when they drive by the Quarry because of the dust. City of Columbia leased the Quarry to Boone Quarries. The City is ignoring dust problem. I have send information to the City regarding dust and they say they aren't responsible for the problem. They say it's the State of Missouri problem. I am not a lawyer, but I understand the Federal law states dust is supposed to stay in the Quarry. | | | | | | | | |
| Comments No fugitive dust violations were found at the time of the investigation. | | | | | | | | |

| Concern No. 48574 Concern Info I work at a facility near Happy Day Farm in Columbia Missouri and there is a strong Cannabis odor coming from the Good Day Farm facility. The odor is strong outside the facility, but is also easily noticed in the hallways and offices. | | | | | | | | |
| Comments At the time of the investigation, odors were present downwind, but were not at the level to be a violation of the Missouri odor rule. The Concern was referred to the Department of Health and Senior Services. | | | | | | | | |
| SERO | 12/22/2021 | 12/15/2021 | Verdesian Life Science/ QC | Cape Girardeau Cape Girardeau | Other Other Other | JD | | |
| Concern No. 48216 Concern Info SP:31636 ??Raw material is loaded outside. Spilled on the ground. When it rains it runs into the ditch southeast of plant. Inside plant there is an environmental concern with water. Plant manager is aware. Dust collection systems are not working all the time large amount of dust inside plant causing employees to wear respirator. Dust drift several miles getting on other buildings and vehicles. Doors are open to let dust out which is not allowed. Raw material in the DC building is washed down an outside drain. Not supposed to happen. | | | | | | | | |
| Comments Verdesian Life Sciences routinely changes the bags/cartridges in the baghouses. They are reading the magnahelic gauges several times per day. There are a total of 10 baghouses located throughout the facility. Last routine bag change and partial changes were reviewed and documentation was provided for review. Floor sweep waste is collected and pickup by Inter-rail Systems for disposal. Documentation provided for review This waste has been determined to be non-hazardous waste. Respirator use in the plant is a plant wide company requirement for employees working continuously inside the plant. All visitors are required to wear a dust mask to enter the facility. All outfalls are routinely tested and reported on DMR. Doors are opened routinely for loading and unloading transport trucks. However, the facility is reviewing practices and the potentials for dust leaving property boundary. The facility is considering incorporating building wide dust control to prevent the potential of dust leaving the property boundary. This could be incorporated into the next routine construction permit application. During the investigation no dust was observed leaving the property boundary. | | | | | | | | |

|----------|--|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|
| Comments | <p>I arrived at Dowd Contracting's office around 2:15 PM. From the parking lot I could see a burn pile that was still smoking just a bit. I walked into the Dowd Contracting office and spoke to a woman named Kathy, whom I presented my credentials to. Kathy said that she was new and basically just answered the phones. I explained to her that I was here to investigate a concern we received regarding a structure fire. Kathy said that something was burned last weekend, but she wasn't here for it and didn't know exactly what was burned. I asked Kathy who the owner of Dowd Contracting was and said it was a Mr. Dustin Dowd. Kathy gave me Mr. Dowd's phone number, but made it clear to me that Mr. Dowd is usually very busy and is hard to get in contact with. Mr. Dowd's phone number is (573) 579-8972. I asked Kathy if I could take a closer look at the burn pile and take some pictures to which she refused. I then left some fact sheets/publications with Kathy at the office and asked her if she would give them to Mr. Dowd the next time he was at the office. Kathy said she would give them to Mr. Dowd and that she would also text Mr. Dowd to let him know I stopped by.</p> <p>I then left the Dowd Contracting office and traveled back to Marble Hill. From there, I tried calling Mr. Dowd, but got no answer. I left Mr. Dowd a voicemail explaining why I was calling him and that I had spoken to Kathy and left her fact sheets/publications. Before I ended the voicemail, I gave Mr. Dowd my contact information and encouraged him to call me back when he was able.</p> <p>The fact sheets/publications I left with Kathy at the Dowd Contracting office were:</p> <p>Illegal Disposal of Construction and Demolition Wastes - PUB2251</p> <p>Facts on Open Burning Under Missouri Regulations - PUB2047</p> <p>10 Code of State Regulations 10-6.045 Open Burning Requirements</p> <p>?Mr. Dowd and I have exchanged a few text messages regarding this concern. Mr. Dowd claims that it was not a structure that was burned, but a brush pile near a recently demolished structure. I asked Mr. Dowd if he could send me waste receipts of the demolition waste that was taken to a permitted solid waste facility (e.g. transfer station or sanitary landfill) and he said that he would. He mentioned that it often takes a while to get the waste receipt and they are usually a month behind to distribute waste receipts. I have not heard from Mr. Dowd or received any waste receipts as of yet. I will continue to keep an eye out for any information from Mr. Dowd. ?</p> | | | | | | | |

|--|--------------------|---------------|---------------------------------|-------------|-----------------|--------------------|-----|------|
| <p>Concern No. 48604 Concern Info SP:367</p> <p>We have an ongoing problem with a resident at 518 Bella Vista Dr. the resident is burning rubber and plastic, wire and other materials at all times of the day and night. we think he may be trying to hide evidence of illegal activities. This morning he burned a large couch which put off eyewatering fumes over a large area of the neighborhood.</p> <p>Comments I arrived at the address of the RP around 12:45PM. The house at this address sits on a curve in the road. The house has a fenced in backyard that you cannot see over. The entire backyard is secluded behind this fence. From the road, I saw no signs of smoke, nor any odors of smoke. The recent rain would have put out any fire and made it hard to detect anything. I walked up to the house and noticed a woman in the garage. I made my presence known, introduced myself, and explained why I was there. I gave this woman my business card and asked if there was a Mr. or Mrs. Ken Brown home. The woman said that neither of them were at the house, but that this was their home and property. She also mentioned that she just stayed at this house. The woman refused to give her name and access to the property any further than us just talking in the garage. I asked the woman if she was aware of any open burning going on at this address and she said that she hadn't. I asked the woman if there was a good way of getting ahold of either Ken or Kim Brown. The woman gave me Kim Brown's cell phone number. The woman was uncertain of when either Ken or Kim Brown would return home. I asked the woman if I could leave some publications/fact sheets on open burning with her and asked that she relay them to Ken or Kim Brown when they return home. The woman agreed to pass the information along. I told the woman that I would try to get ahold of Kim Brown on her cell phone. Before I left, I asked if there were any questions that I could answer for the woman and she replied with no.</p> <p>As I returned back to my vehicle, I tried to call Kim Brown's cell phone number which is (573) 579-8207. According to the operator, this was not a working phone number. I looked at the initial concern report and the CP had given a phone number. I then tried to call that number which was (573) 576-0035. This number seemed to be a working number, but nobody answered and there was no voicemail box set up to leave a message to. I then called the CP's phone number to try and inform him that I had investigated this concern and where I stood on it. The CP did not answer, but he did have a voicemail box so I left him a message. As of today, February 25, 2022, I still have not been able to get ahold of Ken or Kim Brown and have yet to hear from the CP either.</p> <p>The publications I provided the woman at the RP's address with were as follows: Facts on Open Burning Under Missouri Regulations - PUB2047 10 Code of State Regulations 10-6.045 Open Burning Requirements</p> | | | | | | | | |

| Concern No. 48257 Concern Info ??Caller reported that his neighbor was bringing in leaves from other properties and burning them in his backyard. Says th he has burned great amounts of vegetative waste and the smoke gets in his house. I explained the regulations and how difficult it would be to catch him if he's burning only vegetative waste, but that our first step would be to send a letter and fa sheet. I also recommended calling the fire department and having them type up an incident report when this happens, and that they can determine if the burning is a public health hazard. | | | | | | | | |
| Comments ?Sent letter to property owner explaining that if vegetation is brought in from other properties, it must be burned 200 yards away from nearest residen Provided fact sheet on open burning. | | | | | | | | |

| Concern No. | 48260 | Concern Info | Caller stated that the property directly behind him was burning a large amount of trash, construction/demolition waste, and other debris. Says neighbor operates a sort of collection center for contractors to drop their wastes off, and then burns it. H said last time he burned, it kept burning for over a week. | | | | | |
| | | | I told the caller to immediately call the fire department, and let them know to include a description of the materials burned in the fire incident report. I explained that if we could get a copy of the incident report from the fire department, we could use that to issue a Letter of Warning. I told him we could visit the property but that it would take a while to get out. | | | | | |
| Comments | 12/16/21 DBR - I searched the property and found that we had conducted a prior investigation by Caroline Kargus on May 13, 2021. At the time, no violations were found. A letter was sent to the property owner, Corey Wagner on July 20, 2021 explaining that future concerns would be investigated and violations could result in penalties. A copy of our open burning spreadsheet was sent to the property owner. | | | | | | | |
| | On 12/20/2021 I called Troy's Fire Department to to discuss thier finding, According to thier incident report " a large burn pile was located in a large gravel area behind the recidence which contained brush and heavy lumber from possible shed was taken down, There was no on on the property and material mostly burned away. There were no hazards. No further actions were needed". The incident report is attached below. | | | | | | | |
| | We will keep track of the site incase there is future violation. | | | | | | | |

| Concern No. 48340 Concern Info Anonymous caller reported that a trailer was being demolished and burned at 530 Hall Street in Troy. Stated that they had called the police and were told that the burning was legal. | | | | | | | | |
| Comments I contacted the Troy police department, which is located right next to the area where the burning is taking place. I explained the concern, and said that the concerned party had apparently spoken with a police officer who said the burning was legal. I was contacted by Sgt. Bennie Church. Sgt. Church told me they would go investigate and let me know what they found. I received a call back about an hour later. Sgt. Church told me the fire was being out. They were separating the insulation and other materials from the wood, and burning the wood on the property. I explained that most wood used in construction was treated or painted and that this material could not be burned. I thanked him for responding so quickly and offered to coordinate on future open burning concerns to make sure the regulations are being followed. I sent a letter to the owner of the trailer, Todd Mack, explaining that we received a concern and were utilizing compliance assistance. Attached to the letter are fact sheets on open burning and managing construction/demolition waste. | | | | | | | | |

| <p>Concern No. 48434 Concern Info Online concern form:</p> <p>Section 1 - Odor Information Experienced Odor Date and Time: Jan 5, 2022 5:31 pm Experienced Odor Duration: Currently experiencing the odor Experienced Odor Description: Acrid, Sewer, Sweet or Fragrant Experienced Odor Intensity: Strong or Offensive Experienced Odor Address and/or Location Description: 5850 Enright Ave St. Louis Missouri 63112</p> <p>Potential Source: odor coming through the vents Additional Information: spire came out & stated a thermal coupling piping or connection thread was shredded & needed to be replaced along with the powder light. Since then the odor is stronger.</p> <p>Comments On 1/10/22 I called Mary Henderson. I asked if she had contacted Spire. She explained that Spire had already come out and that the odor has gotten worse. I recommended that she contact Spire again and have them look at other sources of the odor. She also said that she was having someone cor to look at her water heater. I said that we regulated odor from sources such as businesses and industries, and that we did not regulate indoor odor. I t her that as a homeowner, I could suggest pouring water down her basement floor drain, because sometimes the P trap dries out and gas could be coming up from her sewer line. She said she would try that and thanked me for calling her back.</p> | | | | | | | | |

|--|--------------------|---------------|---------------------------------|----------------------------|-----------------------|--------------------|-----|------|
| <p>Concern No. 48422 Concern Info Online concern form submitted to EPA: "Mr. Thomas lives in a lake community. It is suspected that Mr. Thomas is burning his HVAC company waste and not disposing of it properly. There has been a situation where I have seen what appears to be a white PVC pipe in an active going fire pit. Mr. Thomas also lights fires close to tree lines risking potential wide spread fire. Mr. Thomas also has put numerous plastic objects in the lake within the community such as pvc pipes which he claims are for the fish and has also put broken up asphalt along the bank. The asphalt was moved per complaint by neighbor but only to be moved to another location and buried near where running water flows into lake. The main complaint is the disposing of his HVAC company waste where he is suspected of burning it causing air pollution. Along with seeing the white pvc pipe looking object. The air tends to have a weird smell at times when there seems to be an active 'burn pit' in his yard. There are no pictures at this time due to not being able to take good quality pictures legally."</p> <p>Comments On 01/19/2022 I contacted the Pacific Fire District Station #2, to see if there was any records of responding to incidents at the alleged party's address. On 01/21/2022, a representative of the fire department sent me documents regarding an incident on 06/18/2021 where Mr. Thomas was burning an oil couch. The responding unit explained to Mr. Thomas that this was in violation of 10 CSR 10-6.045 "Open Burning Requirements", and Mr. Thomas agreed to extinguish the fire. Since the incident was dated a few months back, the agency decided not pursue further action at this time. On 01/21/2022 I visited the residence of Mr. Thomas. I was accompanied by my supervisor, David Ruby. There was no active burning at the time of the investigation. I walked up and down the public road, to try and spot the burn piles on the property. We potentially located two piles, one farther back on the left side of the front yard, and another a few meters back from the road. From our line of sight, we could not identify any materials in the burn piles that are not permitted to be open burned. After an initial assessment of the property, we walked up the alleged party's driveway and tried to make contact by knocking on the front door. No one was available, so I left copies of the Open Burning Fact Sheet (PUB02047), Managing Construction and Demolition Waste (PUB2045), and 10 CSR 10-6.045 "Open Burning Requirements". Also, I left a copy of my business card, for the alleged person to contact me needed. At the time of the investigation, no violations of 10 CSR 10-6.045 "Open Burning Requirements" were noted.</p> | | | | | | | | |

| Concern No. 48425 Concern Info Spoke with a County Representative named David who expressed concerns regarding Western Ready Mix located at INSERT LOCATION. This facility was reported as a concern to Water Pollution Control on INSERT DATE for operating without an MOG49 permit. The facility has since obtained a permit and been returned to compliance. David stated that in order to keep the facility operational during the winter months the facility has obtained a diesel fire boiler which runs during all operational hours. There are visible emissions from the facility and the County representative is concerned there are no permits for this either. | | | | | | | | |
| Comments 1/19/22 I reviewed the facility's file. I found that the facility was issued a construction permit from the APCP in 2016. The facility was also inspected by our office in 2021, and was found to be in compliance. The diesel boiler was listed on the emission point log in that inspection, however the BTU rating was not included, and the boiler was not listed in the facility's emission points in our MoEIS database. I called Jim Lohse to see if he had that information available. He said he would call me as soon as he could get to the facility and find out. 1/19/22 I called the concerned party and let him know of my file review findings. I told him I'd follow up if the boiler was not exempt. As long as the diesel boiler is under 1 million BTUs, it is exempt from construction permit requirements. In the event that it is over 1 million BTUs, I will follow up with the facility and require a permit application. | | | | | | | | |

| Concern No. | 48423 | Concern Info | On 01/19/2022, I recieved a concern from a neighbor regarding a property located at 4200 South Shore Drive, which had t allegedly conducting open burning that was in violation of 10 CSR 10-6.045 "Open Burning Requirements". On 01/20/2022 another neighbor contacted the agency regarding the same property and the alleged open burning violation. The concerne party wished to remain anonymous. They stated that Mr. Thomas (the alleged party) has been open burning his HVAC materials, foam piping, and other petroleum based products. The concerned party stated that the smell was horrendous, ai that they were worried about breathing the potential HAPs that were a result of this open burning. The concerned party sta that there may be up to three potential burn sites on the property. The main goal of the concern was just to get Mr. Thomas to stop burning the alleged materials. | | | | | |
| Comments | On 01/19/2022 I contacted the Pacific Fire Distrrict Station #2, to see if there was any records of responding to incidents at the alleged party's addres. On 01/21/2022, a representative of the fire department sent me documents regarding an incident on 06/18/2021 where Mr. Thomas was burning an ol couch. The responding unit explained to Mr. Thomas that this was in violation of 10 CSR 10-6.045 "Open Burning Requirements", and Mr. Thomas agreed to extinguish the fire. | Concern No. | 48424 | Concern Info | "My neighbor has a 700 gallon outdoor hydronic boiler that he operates incorrectly, intentionally sending noxious and dangerous smoke throughout the subdivision. He burns wet wood and other things that shouldn't be burned. He is causing illness to my family and an overall unpleasant living environment. The wood boiler he is operating has been banned in many states and is a true health hazard. It should not be in a subdivision. When outside the air smells very pungent, it sometimes burns your throat when outside. The smell gets into my garage and house. This is something that needs to stop. He's been unreasonable and threatening to us when we approached him about it. Please help me to get this stopped so we can enjoy our house and not be sick from his carelessness. We have documentation going back showing this has been a long term ongoing problem. I am unable to load pictures on this site but we have a lot of them. Can someone please contact me so I can figure out how to get pictures to you." | | | | | |
| Comments | 1/24/22 I called the concerned party. I explained that I had been researching regulations on hydronic boilers/wood burning heaters and did not have good news. I explained that the Missouri Department of Natural Resources had no regulatory authority over this equipment. The EPA now requires that new residential wood burning heaters meet certain requirements and be certified, but does not regulate heaters that are already installed in homes. The EPA has also banned outdoor wood burning heaters, but again, this does not apply retroactively to equipment already in use. I explained that we regulated odor, but only from 'installations' e.g. businesses with SIC codes. I recommended that the concerned party contact their local city/county authorities to see if there were any nuisance or public health ordinances that could be applied to this situation. The concerned party thanked me for my time and transparency. | | | | | | | |

| Concern No. | 48500 | Concern Info | On 2/1/2022 I recieved an odor concern from an anonymous person regarding the company SteriCycle. The company recieves medical and biohazard waste, where it properly treats and disposes of the waste. | | | | | |
| | | | The concerned party called about a horrid smell that occurs randomly and smells of human decomposition and fecal matte The concerned party has noticed the smell since July and says it is affecting their daily activities. The concerned party indicated that they first noticed the smell around 8 am this morning, and encouraged our agency to investigate the issue today while the smell is still active. The concerned party said that it smells as if the facility is burning the waste. This is not the first time the agency has recieved a concern regarding this facility. Lemma Zewidie and John Mullen have investigated this facility many times in the past and are familiar with the odor concerns. | | | | | |
| | | | The facility is located at 6240 McKisson Ave in St. Louis City. The facility ID is 510-1849. | | | | | |
| Comments | Stericycle is the source of the concern. I inspected Stericycle before as a source of emission and a hazardous waste generator and am familiar with emission points and waste streams. Because the caller indicated the facility as a possible source of the odor, I walked through the facility with the Plai Manger, Mark Sapa. Stericycle is a medical waste processing facility where medical waste is sterilized in autoclaves using steam. Eventually, the steam from autoclaves are vented out into the ambient air through ventilation ducts while the soiled waste is disposed to a land fill. Waste water from water treatment plant is discharged to the City Sewer System. I did not find the Stericycle to be the source of the odor. I drove a mile radius in all direction from the Steriicycle. At 6400 Mckissock Avenue, a block west of Stericycle is a company called St Louis Disposal Solutions, a Merrell Bro Company, which brings in waste from septic tanks (via trucks) from the area residence homes and business. The facility cleans the septic waste by separating the liquid from solid. The sold is transported to a landfill while the liquid is discharged to the sewer. It was about 12pm. Wind was 5 mph frc south. I did not noticed odor from the streets. I went in to the compound (facility's parking lot). Waited about half an hour to catch trucks coming in to facility to unload the septic tank waste. While waiting at the at the parking lot, I sensed a very mild odor (not objectionable to me) that was consistent with what the caller described. I did not notice the same odor outside the property line. I went to Devan Sealants, Inc. located at 6301 Prescott Avenu a block south of Stericycle, where employees at this facility had similar odor issues in the past. I talked to John Abrams, CEO of the company and asked him if there was odor that employees noticed today. He told me there was no odor today but at times when wind picks up and blows out of nori there is odor in the area. | | | | | | | |

Concern No. 48502 **Concern Info** DNR Online Submittal:

"Date of Incident or Date First Noticed
02/01/2022

Please describe your concern, including the location on the property.

Lamke Trenching and Excavating continues to conduct open burns of suspected construction waste in a residential and agricultural area. This burn activity takes place either in the very early morning hours before dawn or on overcast days where it is difficult to see the smoke. The odor and color of the smoke from the burn activity would indicate that they are burning plastic, PVC, electrical wiring insulation, tires, rubber equipment tracks etc. There are a number of houses close to the property and the foul smoke impacts the surrounding residences, many of whom have young children. This burn activity takes place approximately once a month and is always conducted at the rear of the property. I suspect that a phone call to the facility advising that the illegal burn activity has been reported would likely resolve the issue. I'm sure that the burn site can easily be identified from aerial images. Please contact the business and advise that the burn activity has been reported and ask that they stop this activity immediately.

Please provide driving directions from the nearest town and road intersection to the location of the activity causing concern from Hwy 94 travel north on Concord Hill Road. The business location is on the left approximately 3/4 mile north of Hwy 94"

| Comments On 02/02/2022 I contacted Lamke Trenching and Excavating. However, due to the snow storm that had blown through the area the previous evening, business was not in operation for the rest of the week. On 02/07/2022 I contacted Lamke again, and was able to speak to Lester Lamke. I informed him that there was a concern submitted regarding open burning of alleged materials. I asked him if he was conducting open burning on his property, and if so, what was being burned? He said that he does conduct open burning but it is only wood products. When I asked if the wood was treated or untreated, he replied that it was untreated since treated wood is too expensive for the purposes of the wood needed. I informed him that untreated wood is allowed through Missouri Open Burning Regulation and told him that any construction materials are not allowed though. He insisted that he was only burning untreated wood. I asked him if it would be alright if I sent him a couple of fact sheets about open burning and he agreed that would be fine. I emailed him a compliance assistance letter, PUB204 and PUB2045. At the time of the investigation no violations were noted | | | | | | | | |

| Concern No. | 48074 | Concern Info | I work for the Strafford Fire Protection District in Strafford, Missouri. We have a citizen that owns a large amount of land on both sides of the James River @ St. Hwy 125. Every year he burns off his property in a manner that jeopardizes public safety. When he starts his burn he just lights areas that will utilize the wind to complete the process on a particular tract of land. We have been dispatched to said property at least 3 dozen times in the last 2 weeks for concerns about the fire being out of control, thick smoke making roads impassable, no one out with the fire, citizens with difficulty breathing due to the smoke. We know he is within his rights to burn his property but the issue is that he will not fill out the required burn permits won't call in before he begins so we can alert dispatch, is hostile towards fire personnel when they respond to the property, after lighting leaves fires unattended for days, and has no regard for neighbors concerns when face to face contact is made. I know the county has ordinances concerning fire type legality and overnight burning. Neither our department, or Greene county sheriff's department have the authority to issue any type of citation for this. In the past we have attempted to extinguish the fires but unfortunately where he burns is heavily wooded, with no possibility of getting equipment in so fires must be mitigated by hand crews. This ties up department resources for a considerable amount of time. When he comes back around to check on things if we've extinguished a fire he will reignite it. He owns property on both sides of the river which is the dividing line for our and Logan Rogersville's fire districts. I have listened to their radio traffic and jnow that it ha been an issue for them as well. | | | | | |

| | | | Please describe your concern, including the location on the property. After working in the Enforcement Section of DNR's Air Pollution Control Program for 20 years...& now being retired for 15 yrs...below is the first air pollution concern anyone has reported to me... some weeks ago: | | | | | |
| | | | https://americantripoli.com/ "This place is the worst. Spewing orange particulate matter out it's windows an doors. I can't believe they are aloud to do tf in a neighborhood one block from where I work. They must be grandfathered in. It baffles the mind." | | | | | |
| | | | My reply: Sorry to hear this. It makes me feel like I should, for the 1st time in the 15 yrs. since I retired, report it to my former Air Pollution Control Program. Is there more you could add to your observation?...like photos of the visible particulate matter in the air?....time of day(all.. day?).....street address?.....etc. | | | | | |
| | | | "I have seen them in the act. But its not like they are at it every day. But they are making no attempt at keeping it clean. It's this old drafty building and the dust is just pulled up everywhere. I can't afford to be a whistle blower in my position. But I c: get you the address." | | | | | |

| Concern No. 48308 Concern Info The neighbor to my child's daycare center (Little Dreamers Daycare) has been burning off and on for months. Fills the entire area with smoke and smells for days. We have witnessed dump trailers of construction materials going when trying to turn into the daycare to pick up our little boy. My concern is for the environment and the air quality for the children. This has been reported to DNR, the local fire Department and nothing has been done. Second concern submitted stated the same issue - they are burning something very smelly next to the daycare my child attends and they are trying to cover it with dirt | | | | | | | | |

| Concern No. 48392 Concern Info The caller reported that a mobile home is being burned. The local fire department and sheriff's office responded to the local and witnessed the burning taking place. The duty contacted both the local fire department and sheriff's office to verify the report. The duty officer was provided the potentially responsible party's (PRP) phone number and attempted to contact the PRP, but was unsuccessful. The Laclede County Sheriff's office event number for this case is 2022 01-778. The individual suspected of burning the mobile home is Bush Shivers. | | | | | | | | |

| Concern No. 48438 Concern Info A number of protein feed tubs and cow shot bottles have been dumped into Norfolk lake over the years. The caller has collected 5 feed tubs and around 10 shot bottles so far this year and hundreds more over the years. The protein tubs and bottles are being dumped near Liner Creek (He states you will have to follow him there to find them as they are hidden). Caller also states that tires are being burned yearly (20 or so this year) at Bridges creek. He says he has repeatedly reported this and nothing has happened. | | | | | | | | |

| Concern No. 48452 Concern Info Concerned party reported that some is burning landscape timbers and railroad ties soaked in creosote on the lot next to he lot. She has pictures before they started burning. She also has photos after they set it ablaze. First time they have set the pile on fire, but they have been dumping trash and trade waste for the past week. They put PVC pipes in the pile as well. C Sunday 1/30/2022 they dumped another large pile of railroad ties. They set it on fire on Monday at 5:00 PM. There is still a fire burning, and inside the concerned party's house it smells like smoke and creosote. Even with precipitation it is still burning. Concerned party reported that Larry Gideon dumped it and is burning it. Concerned Party did not have contact info for the owner of the property. Kevin Cutbirth, Deputy Fire Chief in Highlandville, MO knows the name of the property owner CONCERNED PARTY | | | | | | | | |
